EDUCATION

Bachelor's Degree in Computer Science

Queens College – Flushing, NY

Jan 2023 – Dec 2025

Clubs: Treasurer of Crypto Research QC, Associate of Code for All

Relevant Courses: Software Engineering, Computer Architecture, Operating Systems, Data Structures, Algorithm Design & Analysis, Theory of Computation, Compilers, Assembly Language

PROFESSIONAL EXPERIENCE

AI Trainer – Handshake

Aug 2026 – Present

- **Project Manuscript II:** Analyze short video clips and comprehensively identify and describe audible events for multimodal AI training, capturing fine-grained speech and non-speech audio details.

Cybersecurity Expert – Mercor

July 2026

- Reviewed code to identify security vulnerabilities and design flaws.
- Assessed identified security issues for validity and documented the underlying risks in clear reports.

Software Engineer - AI Trainer – Mercor

May 2026 – Present

- Supported AI model improvement for a leading AI research lab by evaluating a diverse set of outputs against task-specific criteria and providing structured written feedback.
- Reviewed and tested AI-generated outputs, wrote corrected solutions, and documented quality issues.

Payment Analyst – Amalgamated Employee Benefits Administrators

Mar 2026 – May 2026

- Managed benefit and pension payment workflows, including monthly payment schedules, interest calculations, direct deposits and deductions, tax withholding, and audit documentation.
- Investigated Salesforce inquiries and processing discrepancies, collaborating with analysts and examiners to ensure accurate EFTs, payment records, and pension certification forms.

Full Stack Developer Intern – Research Foundation of CUNY

July 2024 – August 2024

- Led a team developing a React-based multimodal chatbot using the Gemini API, supporting image and audio inputs.
- Integrated Google Cloud Text-to-Speech and Speech-to-Text APIs for real-time voice input and spoken responses, enhancing the company's platform.
- Added deepfake capability by integrating a Python-based child process with the Node.js backend while maintaining UI consistency.

PROJECTS

EasyWhisperUI – <https://www.github.com/mehtabmahir/easy-whisper-ui>

- Built a cross-platform desktop app in Electron and TypeScript for local Whisper transcription on Windows, macOS, and Linux with GPU acceleration.
- Grew the project into a community-adopted open-source tool, reaching over 500 stars on GitHub.
- Engineered an automated Windows setup that validates dependencies and builds Whisper with Vulkan acceleration for the user's specific GPU.
- Implemented queue-based batch processing as well as live transcriptions.

Workout Counter iOS – <https://github.com/mehtabmahir/Workout-Counter>

- Built a privacy-first iOS fitness app using SwiftUI, AVFoundation, and Apple Vision to count exercise repetitions through real-time on-device body-pose detection.
- Engineered a reusable multi-exercise workout system with joint-angle analysis, smoothing, confidence filtering, movement state machines, missing-frame tolerance, live skeletal overlays, rep goals, and audio/haptic feedback.

SKILLS

Languages: Swift, C++, TypeScript/JavaScript, Python, Java, SQL, PowerShell

Frameworks & Libraries: SwiftUI, AVFoundation, Vision, Electron, React, Node.js, PyTorch

Developer Tools: Git, Xcode, Visual Studio, Docker, CMake, FFmpeg, Vulkan

APIs: whisper.cpp, PSAPI, Windows API, OpenAI API, Google Gemini API, Google Cloud APIs
